

**Ruth Oshikanlu QN FiHV MSc, Registered Nurse, Midwife and Health Visitor**

TV and Radio expert for pregnancy and the first two years of life, maternal and infant mental health issues with a specialism in supporting pregnant women who have had assisted conception or pregnancy loss

Author of *Tune In To Your Baby: Because Babies Don't Come with An Instruction Manual*

Creator of *Tune In To Your Baby™* parenting programme

Multi award-winning parenting expert

Queen's Nurse and Fellow of The Institute of Health Visiting

Ruth's parenting centres on beginning the bonding process in the womb. Evidence from neuroscience shows that the care baby receives in pregnancy and the first two years of life, are critical for outcomes later in life. A pregnant mother suffering from stress can sometimes pass on the message to the unborn baby that the world will be dangerous, so that the child struggles with many social and emotional problems. It is for this reason that Ruth's project for her Masters dissertation focused on how prospective parents can promote parental-foetal attachment. As such, rather than bonding with your bump, Ruth encourages bonding with the baby that creates the bump.

*"Conception is when parenting begins and the nine months of pregnancy is an imperative time to form and grow a relationship with your baby so that your baby is born bonded, because **happy babies are made inside the womb**. Despite my professional experience, it was my personal experience that taught me the most vital lessons. **I almost lost my baby at 20 weeks gestation**. During the following **five months hospitalisation** in pregnancy, I was forced to tune in to my baby, connect with him to find out his needs and ensure I met them. The strong relationship we established in pregnancy helped both of us transition effortlessly into our new roles as mother and infant. I learned the hard way how to parent and have since made it my mission to help pregnant women become serene and soulful as they grow and raise happy babies. This equips mothers with a template that they use for the rest of their parenting journey"*

## Ruth's Background

Ruth is The Pregnancy Mindset Expert and supports pregnant women who have had assisted conception

She is the author of *Tune In To Your Baby: Because Babies Don't Come with An Instruction Manual*. Ruth has created *Tune In To Your Baby™* - a **holistic parenting programme** that enables pregnant women and new mothers develop secure attachments with their babies from the womb, thus promoting maternal and infant mental health.

Ruth is a nationally recognised expert nurse, midwife and health visitor with over 22 years track record in delivering secondary and primary health care services in the statutory and voluntary sectors. She is a parenting expert and has supported thousands of women and babies in pregnancy, labour and childbirth, the postnatal period through to toddlerhood.

Ruth is a regular columnist in The Nursing Times Leadership Academy Series, Community Practitioner, Journal of Health Visiting and has published several feature articles in numerous national nursing and healthcare journals. Ruth is a regular guest lecturer at numerous universities on the subject of parental-foetal attachment, the subject of the PhD she is currently undertaking.
